

## **Helping people with Micro tapes**

Hi !!!!!

Thank you very much for downloading this book

I'm Kazz and I feel my mission in life is to help people like yourself build a business where you can help people.

This book is to help you understand a bit about the amazing micro tapes and to help you with your business grow in a fun and exciting way .

## **Helping people is fun**

The more people you help the more money you will make. It's important to focus on helping people and in return the more money you will make. Happiness is achieved by surrounding yourself with amazing people, doing things you enjoy and improving in education. You also need to except people for their differences and making money with what you love to do. People love to spend money as much as they love to make money.

### **Your clients will love spending money too**

The above is very important to remember, after all they come to your business to spend money to receive something from you that they want or need. If you have a service that helps someone one achieve what they are after such as long thick hair they will be so happy. Providing hair extensions is amazing and gives the clients instant gratification .

Some people feel guilty about making money. The only time you should feel guilty about making money is if you are scamming people or generally don't care about providing a great service or outcome or you just want their money.

### **If your not wanting to help clients then this isn't for you**

A lot of business do just focus on the money which isn't really helpful as they will miss a lot of ingredients to move their business on. Which is gain more clients, make more money and networking. You will also meet a lot of people and friends along the way.

Exactly business is about sharing a passion or something you are good at with everyone. Yeah its about helping people solve their pain and give them pleasure. It's about creating an amazing world for yourself.

## **A successful business should be fun**

Your thoughts are a very powerful thing. It's how you create your world around you. Yeah you need to put in some hard work and plans which the micro tape course will show you. The only meaning your business has is the meaning you give it, this comes from your thoughts when you think about creating your hair extension business

## **In this book I will give you an overview of the course, helping people and making money**

I have built my business myself from scratch on the principles of helping people and doing what I enjoy. You can do it as well. After being in lockdown you can review your situation and find out what you want in your life and what you would love to do

First though make sure you hop over to facebook and keep in contact with us the Page is Kazzhair UK and Academy. After reading this Ebook there will be a link to begin the Hair Extension course. Once you have purchased the course you will also become a member on our closed group which gives you information, videos, support and you can communicate with all the girls that have done courses with us.

To start I would like to share my own story with you now. You can scroll past it but it would be lovely for you to get to know me a bit better before continuing.

I started to do hairdressing when I was younger and worked in a hair dressing salon. I found I needed more in my life and thought going to university would help to improve my education. I completed a Bachelor of Education and became a teacher. I taught children and adults for many years. I also became a director of Early years schools but felt unfulfilled towards the end.

### **Doing what you love in life helps right ?**

We packed up and moved to Cornwall with no jobs. I wanted to have my own business and do what I love. Doing hair was like a hobby to me and I really wanted to help people. I did refresher courses in hairdressing, hair extensions and marketing.

### **No money wont stop me because if your not growing your dying right**

I had 500 pounds which I spent on doing a room up at the back of my house. I decided just to do hair extensions as I felt it helped people achieve what they wanted and had instant gratification. My mind was on helping people and that is what I did for years. My clients grew and I ended up with quite a big business

### **Time to Plan as without a plan you don't know where you are going**

I did a marketing plan and continued to help people. I also wanted to share my passion so I decided to offer courses. Being a teacher I was able to offer this. We now have a salon/Academy, offer courses, offer hair extensions, offer hair loss, we are a supplier of extensions in the UK and have 6 staff members

### **Some figures for you**

Once you have some clientele they will need to come back to you to have maintenances every 4-6 weeks. It's really important to book your clients in for maintenances as this keeps your business going after you fit their extensions. Maintenances are around 60 to 80 pounds. The more Clients you help the more money you will make.

Remember you are helping people and they will pay for a great service to get rid of their pains and gain pleasure. I wear extensions and cant do without them due to having thin wispy hair

### **Why Micro tapes**

There are so many different applications out at the moment keratin bonds, wefts, nano rings, big tapes and micro links. All of these can cause hair loss if aftercare is not good, you don't keep up with your maintenances or they are not applied right in the hair.

### **Yay!!! Micro tapes do no damage**

These are the only hair extensions that do no damage even if they are not put in right, or aftercare is not good. They will simply just come out. This is so reassuring because it gives confidence to you and your client that all is safe. If you google micro tapes you will see there are no horror stories about them not like the other applications

### **Where do I buy the hair?**

Great news!!!! We are a hair extension supplier throughout the UK. Micro tapes originated in Australia, I brought them to the uk and offer face to face courses. This online course is the only micro tape course in the UK. So you will be one of the first to offer this new application to your clients. At the moment we are the only UK based business that supplies micro tapes. They are very tiny and are not like the big tapes that are available through out the uk

### **How do I get started on the course**

You can go to [www.kazzhair.co.uk](http://www.kazzhair.co.uk)

Click on courses

Click to buy the online micro tape course

If you need a kit you would then go to accessories and click to buy the kit. This is recommended as you will need this to complete the course

### **Wha hooo**

On the online micro tape extension Course you will also learn how to promote your business and “The Secret to success “ This will help you gain confidence to begin or carry on with your business .

### **My whole business was about making you feel good, sexy and build your confidence, not just about selling hair extensions**

This is one reason why my business grew so much, I was not selling the service I was selling the way people feel after having the service. Making sure everyone had a fun time when coming to us so that they wanted to come back again and again

### **Buyers feeling of a high**

Remember how it feels after you have just bought something or had a service you love

It really feels good when you buy something you really want

Imagine a client with thin short hair walking out with long amazing hair after having a fun time with banter and a great coffee

You are making them feel good so they will definitely come back to you for their maintenances and they will feel you are trying to help if your sincere . People love to be cared about.

They will tell their friends and family and become your number one fan which will help you grow your business

### **Who is the Micro tape extension course for?**

**This course is not for everyone** – Just like not all products and services are for everyone
